Listing of Claims:

This listing of claims will replace all prior versions, and listing, of claims in the application.

1.   (Currently Amended) A method of conducting a wagering game, comprising:

displaying a plurality of selectable objects in ~~on~~ a first display image;

selecting one or more of the selectable objects;

revealing one or more indicia associated with the selected objects; and

revealing, in ~~on~~ a second display image <u>distinct from the first image and replacing the first image in whole or in part</u>, one or more indicia associated with the unselected objects <u>of the selectable objects</u>.

2.   (Original) The method of claim 1, wherein the step of displaying the plurality of selectable objects occurs in a bonus game.

3.   (Original) The method of claim 1, wherein the step of displaying the plurality of selectable objects occurs in a basic game.

4.   (Currently Amended) The method of claim 1, wherein said indicia <u>associated with the selected objects</u> is indicative of an award, an end bonus marker, or a trigger for another game feature.

5.   (Original) The method of claim 1, wherein the step of revealing the one or more indicia includes revealing the indicia in proximity to the respective selected objects.

6.   (Original) The method of claim 1, wherein the second display image presents the indicia associated with the selected objects and the indicia associated with the unselected objects.

7.   (Original) The method of claim 6, wherein the second display image presents a total award based on the indicia associated with the selected objects.

8.   (Original) The method of claim 6, wherein the second display image presents the selected objects with associated indicia as a group.

9.   (Original) The method of claim 6, wherein the second display image presents the unselected objects with associated indicia as a group.

10.   (Original) The method of claim 1, wherein the first display image and the second display image are presented on a common display.

11.   (Original) The method of claim 1, wherein the first display image and the second display image are presented on different displays.

12.   (Currently Amended) An apparatus for conducting a wagering game, comprising:
       a value input device for receiving a wager from a player;
       a display for presenting a plurality of selectable objects in on a first display image; and
       a controller operative to select one or more of the selectable objects; reveal one or more indicia associated with the selected objects; and reveal, in on a second display image distinct from the first image and replacing the first image in whole or in part, one or more indicia associated with the unselected objects of the selectable objects.

13.   (Original) The apparatus of claim 12, wherein the display is operative to present the plurality of selectable objects during a bonus game.

14.   (Original) The apparatus of claim 12, wherein the display is operative to present the plurality of selectable objects during a basic game.

15.   (Original) The apparatus of claim 12, wherein the controller is operative to reveal the indicia in proximity to the respective selected objects.

16.   (Original) The apparatus of claim 12, wherein the second display image presents the indicia associated with the selected objects and the indicia associated with the unselected objects.

17.   (Currently Amended) The apparatus of claim 16, wherein the second display image presents a total award based on the indicia awards associated with the selected objects.

18.   (Original) The apparatus of claim 16, wherein the second display image presents the selected objects with associated indicia in an identifiable group.

19.   (Original) The apparatus of claim 16, wherein the second display image presents the unselected objects with associated indicia in an identifiable group.

20.   (Original) The apparatus of claim 12, wherein the second display image is presented on the display.

21.   (Original) The apparatus of claim 12, wherein the second display image is presented on a second display.

22.   (Currently Amended) A computer readable medium encoded with a program for implementing a method, said program for directing a device to perform the steps of:
        displaying a plurality of selectable objects in on a first display image;
        selecting one or more of the selectable objects;
        revealing one or more indicia associated with the selected objects; and
        revealing, in on a second display image distinct from the first image and replacing the first image in whole or in part, one or more indicia associated with the unselected objects of the selectable objects.

23. (New) A method of conducting a wagering game, comprising:

displaying a plurality of selectable objects in a first display image;

selecting one or more of the selectable objects;

revealing one or more indicia associated with the selected objects; and

revealing, in a second display image, one or more indicia associated with the selected objects in a first region and one or more indicia associated with the unselected objects of the selectable objects in a second region distinct from the first region.
